

Richard Cunnien, who received an electronic implant at Sibley Memorial Hospital in December, recently had his first post-operative visit with William McFarland of the Audiology Department. McFarland is pictured adjusting the external stimulator—putting the external coil in place over the implanted coil. McFarland will work with Cunnien, who lost his hearing 10 years ago, for about one year. During that time, Cunnien will be tested and trained to use the device to aid his speech training.

Research studies rubella, diabetes link

"Many complications of rubella are present at birth but do not develop until years later," commented Kathy Shaver. "At birth we mostly associate congenital rubella with heart problems, cataracts, deafness and cerebral palsy. During the early school years we notice some learning disabilities. And in adulthood there is possible development of vascular diseases and diabetes." Yes, maternal rubella may lead to diabetes in the young deaf adult. "It is real," confirms Shaver, "and people should be concerned."

Kathy Shaver came to Gallaudet this fall after earning her doctorate in human genetics at the Medical College of Virginia. Now an assistant research scientist with the Division of Research, she is investigating the incidence of diabetes in rubella-deafened people and looking for genetic markers that will lead to better diagnosis and treatment. She is studying a form of diabetes that occurs in young adults in their 20's and 30's.

The research is based on a theory that there is an inherited tendency to develop diabetes and that an environmental insult such as rubella virus can trigger this tendency. In 1970, an Australian study found that 40 percent of that country's 1940 rubella-epidemic deafened population either had diabetes or showed pre-diabetic conditions by the age of 30. That is four to five times more prevalent than in the general population.

Diabetes is a disease caused by a lack of or ineffective use of insulin in the body. Insulin is naturally manufac-

Kathy Shaver

tured by the body to carry food to the cells. Lack of insulin interferes with the body's ability to convert food into energy.

Shaver became interested in genetic research while working on a degree in psychology at Western Maryland College. In McCay Vernon's class she wrote a paper on genetics and deafness. Vernon suggested that she continue her studies at the Medical College of Virginia. Her current research at Gallaudet is funded by a National Institute of Health grant awarded to the Medical College of Virginia to study the genetic link between diabetes and rubella. This is a renewal of a previous grant during which students at the

Accreditation teams review programs

Education

A visiting team from the National Council for Accreditation of Teacher Education (NCATE) is now on campus to evaluate 13 education programs. Composed of experts from schools and universities throughout the United States who have received training in the NCATE evaluation process, the 11-member team will be reviewing the programs through Wednesday, March 14.

NCATE is the only recognized national professional accrediting agency for programs that prepare teachers and other professional personnel for schools. It is recognized by the Council on Post-Secondary Accreditation and the federal government. Most states will issue only professional certificates to graduates of NCATE-accredited programs. With the successful achievement of state approval, which has been completed this year, and NCATE accreditation, graduates of all education programs on campus (except two programs too new to qualify) will be eligible for state certification in all 50 states.

Until now, the M.A. in Education of the Hearing Impaired was the only nationally accredited education program on campus.

The following programs will be evaluated during this visit: M.A. in Education of the Hearing Impaired, with specializations in Early Childhood, Elementary, Secondary and Multihandicapped Hearing Impaired; B.A. in Education—Early Childhood Education, Elementary Education, Secondary English Education, Secondary Home Economics Education, Secondary Mathematics Education, K-12 Physical Education, Secondary Science Educa-

continued on page 3

Social Work

The Social Work Program, first accredited seven years ago, was reviewed late last month for reaccreditation by an on-site evaluation team from the Council on Social Work Education. The Council on Social Work Education accredits all undergraduate and graduate programs in Social Work.

The two-member evaluation team visited campus Feb. 19-21. During that time, faculty, administrators and students were interviewed about the program, as were agency supervisors from the community who work with Gallaudet interns. The College's library resources were also examined and both the College and Social Work program's affirmative action policy reviewed.

First accredited in 1977, the program was reaccredited for four more years in 1980. A part of the Sociology and Social Work Department, the Social Work Program is an undergraduate program and has four full-time faculty members and 28 majors.

Students who graduate from an accredited social work program can become social workers in all 50 states and abroad. In addition, those students who graduate from an accredited program with an A or B average qualify for advanced standing in graduate programs in Social Work.

"The big factor in going through the accreditation process is that it assures that our students are getting a quality education and that they'll be competitive with other graduates from accredited social work programs," explained Janet Pray, director of the Social Work Program at Gallaudet.

The evaluation team, composed of a Social Work professor from the Univer-

The Gallaudet Intramural Department Office and Recreation Club hosted "Jump Rope for Heart" March 2 at the Field House. Working in teams, jumpers jumped rope for three hours while raising funds for the American Heart Association.

Serendipity

Library Bits & Pieces

Women's issues

by Ruth Nussbaum

The College library is following a national trend in acquiring materials about women's issues. There has been more interest in women's issues in the humanities and social sciences, especially during this past year. Several new books reflecting this growing awareness are available for circulation. They are as follows:

- "Manual for Woman's Self Defense" by Michael Pickering, 1963 (Athletic Institute, FL) 613.66 P52m 1983. Self-defense is considered an extension of the martial arts. In this book, the author very clearly and precisely explains several methods that can and should be used in real street or home situations. Each stance or hold is accompanied by clear photographs. Examples of how to handle attacks in car, home and street are also included.

- "PMS/Premenstrual Syndrome" by Robert Norris, 1983 (Rawson Assoc., NY) 618.1 N6p 1983 and "PMS: What Every Woman Should Know" by Reni Witt, 1983 (Stein & Day, NY) 618.1 W5p 1983. The authors present the latest theories on premenstrual syndrome and suggest various ways to alleviate the aches and pains and mental distress. Both books recommend almost the same types of diet, exercise

and suggested hormonal and psychological therapy.

- "The Hidden Half: Studies of Plains Indian Women" by Patricia Albers and Beatrice Medicine, 1983 (University Press of America, MD) 305.4 H5 1983. This is a collection of 10 papers that analyze the role and status of women in the Plains Indian culture. The perspective is both historical and contemporary. The editors point out that, up until very recently, interpretation of indigenous societies excluded female views. Today, there is a beginning re-evaluation and reconstruction of individual cultures based on this new awareness of women as a whole.

- "Wooing, Wedding and Power: Women in Shakespeare's Plays" by Irene Dash, 1981 (Columbia University Press, NY) 822.33 Z4da 1981. The author analyzes the female characters in 10 of Shakespeare's plays and notes in detail the changes from the original works. In addition, the author examines how Shakespeare's original portraits of strong, attractive, intelligent and humane women were changed subtly over the years by various editors, critics, directors and producers, to fit into the male-dominated, conventional society. The plays discussed are "The Taming of the Shrew," "Romeo and Juliet" and "Anthony and Cleopatra."

Visitors Center seeking faculty help

The Visitors Center regularly arranges visitation programs for prospective students and their parents as well as professionals in the field of deafness. The Visitors Center needs assistance from College faculty members so that these visitors can observe classes as part of a complete visitation program.

The Visitors Center staff will try to limit the number of observers to three a class and will always confirm an observation only after discussion with the instructor or the department chair, depending on department policy.

The Visitors Center staff can arrange visitations more efficiently if they know times, days, locations and titles of classes which faculty members feel are appropriate for observers. Faculty members who are willing to accommodate groups of more than four persons should inform the Visitors Center.

Spring is the busiest time for planning prospective student visitations. Suggestions, comments and offers of assistance are welcome. Interested faculty members should contact the Visitors Center at x5703.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff, and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
03/26/84	ED/RSA: Special Projects and Demonstrations for Vocational Rehabilitation Services to Severely Handicapped Individuals
03/30/84	ED: National Diffusion Network
04/02/84	ED/RSA: Rehabilitation Long-Term Training Projects
04/02/84	ED/RSA: Special Recreation Programs for Handicapped Individuals
04/16/84	NIHR: Fellowships in Handicapped Research
05/01/84	HRSA: Maternal and Child Health Discretionary Grants

07/01/84 NIA: Social Environments Influencing Health and Effective Functioning in the Elderly

Short-term fellowships

The World Health Organization (WHO) will award a limited number of short-term fellowships in 1985 for travel and study abroad related to the improvement and strengthening of health services in the United States. Applications are due Sept. 30, 1984.

U.S. citizens who are involved in the operational or educational aspects of health, allied health, environmental health and engineering activities and who are employed by state and local governments or educational agencies are eligible for these awards.

For further information, contact the Office of Sponsored Research or Secretary, World Health Organization, Fellowships Selection Committee, Health Resources and Services Administration, Parklawn Building, Room 16A-17, 5600 Fishers Lane, Rockville, MD 20857, 443-6580.

Don Moores, director of the Center for Studies in Education and Human Development, a division of the Gallaudet Research Institute, addressed the Communications Unit at KDES recently to discuss current research and how it applies to the classroom.

Honorary society initiates members

The Pi Rho Chapter of Kappa Delta Pi at Gallaudet College held its initiation and installation ceremony Feb. 8 in the red room of the Student Cafeteria.

John Merryman of Indiana University in Pennsylvania, national vice president of Kappa Delta Pi, officially installed the Pi Rho Chapter as a unit of the national society. Under his guidance, selected undergraduate and graduate students and faculty of Gallaudet College were initiated into the new chapter. John Schuchman, vice president for Academic Affairs at Gallaudet, accepted the charter of the Pi Rho Chapter on behalf of the College and was presented with a certificate of honorary membership.

Officers of the new chapter were also installed. They are: Mark Goldfarb, president; Bruce Baily, vice president; Frances Pesciotta, secretary; and Julie Johnson, treasurer. David Martin of the Department of Education was officially

installed as the chapter counselor.

Kappa Delta Pi is an honorary society with chapters throughout the United States. Its membership is composed of students and faculty who have a professional interest in schooling and education. Given this focused area of interest, the students and faculty of the Pi Rho Chapter will bring to the Gallaudet campus special events related to schooling and education. One such event was the recent colloquium on campus, "The Impact of 'A Nation At Risk'." That colloquium was co-sponsored by the Pi Rho Chapter and featured Susan Traiman from the National Commission on Excellence in Education.

Undergraduate and graduate students studying for future professional roles in schools and faculty who teach in programs which prepare school personnel should direct questions about membership to David Martin.

... Rubella, diabetes link examined

continued from page 1

Virginia School for the Deaf at Staunton, the Maryland School for the Deaf at Frederick and MSSD were studied. This five year renewal will enable Shaver to follow the students as they enter their 20's and also to test other rubella deafened students as they enter the preparatory and college programs at Gallaudet.

As of January 1984, 280 students from the area's state schools and MSSD have participated in the study. Wanda Hicks, specialist, Special Services, has assisted with the MSSD student involvement and Marsha Melamed and Holly Bell of Student Health Services also assist with the project. Students are given a basic glucose tolerance test and blood samples are taken. Through a series of comparisons and contrasts Shaver is searching for pre-diabetes abnormalities and possible common genetic markers. Preliminary results show that 20% of those tested

are either diabetic or have an abnormal result in the glucose tolerance test that may indicate possible future development of diabetes. Researchers will stay in contact with these students, their families and doctors for the duration of the study.

Research lecture set

On March 28 at 4:30 p.m., Dr. Hilde Schlesinger will speak on "Psychological Reactions to Hearing Loss." Her presentation will be part of Gallaudet Research Institute's seminar series, "Hearing Loss in Adulthood."

This presentation is open to the general public and all campus members. It will be held in the MSSD auditorium.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

Lecture, reception mark end of Black History Month

A program celebrating Black History Month at the Northwest campus cafeteria was held Feb. 29, capping off activities held throughout February in observance of Black History Month. About 70 persons—faculty, staff, students and members of the Northwest community—attended the program, which featured a reception and a lecture.

Sponsored by the Intercultural Relations Committee at the Northwest Campus and the College's Equal Employment Opportunity Office, the program's guest lecturer was Ernest Hairston, co-author of "Black and Deaf in America: Are We That Different?"

Hairston, a 1961 graduate of Gallaudet College, discussed the book, which he wrote with Linwood Smith, a 1965 graduate of Gallaudet. Smith died in 1982, one year before the book was published.

In discussing the book, Hairston noted the importance of role models in the lives of deaf black children and the importance of parents urging their children to set their goals high rather than expect less because they are deaf.

Hairston also contended that Gallaudet has a responsibility to recruit more black students and announced the formation of the Black Gallaudet Alumni Association which has met several times since last fall. The chairman of that group is Reginald Redding, a middle school instructor at KDES.

Prior to Hairston's talk, Ann Davidson, dean of the School of Preparatory Studies, welcomed the group. Howard Busby, assistant dean of the School of Preparatory Studies, introduced Hairston and Lillie Ransom of Experiential Programs Off Campus opened the program by signing the National Black Anthem. Following Hairston's remarks, the group gathered at the lounge for the reception, during which time Hairston autographed copies of his book.

Throughout the month of February, activities were held at both the Northwest and Kendall Green campuses. A lecture series was held at the Northwest campus. The activities were well received by the campus community, according to Sandi LaRue, a developmental counselor at SPS who arranged activities at the Northwest campus.

continued from page 1

sity of North Carolina at Greensboro and a professor of Social Work from the University of Pittsburgh, will submit its report this month to the Commission on Accreditation. Pray expects the College will know by June what decision has been reached on reaccreditation.

No OTG March 19

On the Green will not be published March 19 because of the Spring Break. The next issue will be published March 26. Anyone wishing to submit information for publication in that issue should do so by Friday, March 16. Items should be sent to *On the Green*, Alumni and Public Relations Office, Chapel Hall.

Entitled "Sunrise, Mt. Tom, The Sierra Nevada," this photograph by Ansel Adams will be on display at an exhibit opening March 21. This photo was reproduced with permission of The Minneapolis Institute of Arts.

Photography exhibit opens March 21

An exhibit of more than 40 photographs by Ansel Adams will open March 21 in the Learning Center and MSSD. Borrowed with the assistance of the Minneapolis Institute of Arts, the photographs will remain on exhibit through June 29 on the lower level of the Learning Center and the second floor of MSSD near the Central Administration area.

Hailed as the dean of modern photographers, Ansel Adams made an unequalled impact on both the aesthetics and theory of photography. Although he is best known for his landscapes,

the exhibit includes portrait and architecture subjects as well.

Adams has been an ardent conservationist and his powerful and majestic images have served as a communication tool for the conservation movement. He has also been a champion of the medium of photography and its place in art.

A captioned videotape about Adams will be available. For more information, contact Judy Mannes, Office of Fine Arts in Education, at x5408 (voice and TDD).

Medical crisis counseling the topic of Social Work lecture

The Social Work Program of the Department of Sociology and Social Work will host a lecture March 26 from 7 to 9 p.m. in the Ely Center auditorium.

The lecture is the first in a series planned by the Social Work Program and coincides with Social Work Month. It is open to the entire campus community and should be especially interesting to persons working in the fields of counseling, psychology, social work, health care and aging.

The scheduled speaker for March 26

is Irene Pollin, a professional social worker and executive director of the Linda Pollin Institute of Chevy Chase, MD. The Institute, founded in memory of her daughter, specializes in the field of medical crisis counseling for the chronically ill and their families.

Pollin's topic will be "Medical Crisis Counseling." She will discuss the implications of terminal and chronic illness and the importance of individual and family counseling for the chronically and terminally ill.

Pollin, who is married to Abe Pollin,

Pilot tutoring project under way in Pre-College model schools

Model Secondary School for the Deaf students are gaining practical work experience while Kendall Demonstration Elementary School students are getting extra individualized attention as the two schools cooperate on a pilot tutoring project.

This semester, 16 students from Connie Simmers' home economics classes, "Learning About Younger Children" and "Infants and Toddlers," are working as teacher-aides at KDES.

Most of the MSSD students devote one full day every week to KDES. For their efforts, each will earn one home economics credit unit and one career development credit.

"To stimulate a real job situation we had them come for interviews," said Susan Zylstra-Owner, Special Opportunities Program supervisor at KDES.

MSSD instructor Simmers says her students will "be helping teachers with kids, working with materials and working directly with individuals."

The project began last year during the spring and involved only one KDES department. "We tried it out and it was so well received," Simmers said. "So many people at Kendall became interested."

MSSD students will be working with Goldie Trbojevich in the Learning Center, Fran Hisler in Occupational Therapy, Nurses Jan Kemper and Brenda Thaxton in the Health Room, Rachel Harris in Pre-School, Pam Luft in the Special Opportunities Program and Marianne Sasseen in the Intermediate Department.

Seven-year-old Vu Lam, a student at KDES, takes his turn at the rope during "Jump Rope for Heart" held at KDES.

... Education programs reviewed

continued from page 1

tion, Secondary Social Studies Education; Ph.D. in Special Education Administration; M.A. in School Counseling and Guidance; and Certificate for Advanced Graduate Study in School Psychology.

The new M.S. in Educational Technology will be evaluated but not accredited because it does not yet have graduates. The Ed.S. in Supervision, which began this year, is too new to be included in the evaluation at this time. Both programs should be eligible in two or three years.

According to Thomas Landers, dean of the School of Education and Human Services, 80 SEHS and College of Arts and Sciences faculty members organized in eight committees have worked for almost two years conducting the self-study of the programs and producing the 900-page "Institutional Report"

in preparation for the NCATE visit. Chairs of the committee were John Madison, Steering Committee; William Marshall, Governance; Barbara Bodner-Johnson, Curriculum; Ronald Dreher, Faculty; Francine White, Students; Ronald Nomeland, Resources; Thomas Kluwin, Evaluation and Planning.

'Ole Jim' lunch special

A luncheon special, "St. Paddy's Appetite," will be held March 16 at 'Ole Jim.' 'Ole Jim' will then close for the week of Spring Break, March 19-23.

The menu for the March 16 luncheon special will include corned beef and cabbage, cooked potatoes, buttered carrots and dessert. Cost of the lunch is \$4.95.

'Ole Jim' will reopen for lunch March 26, with Happy Hour scheduled to resume shortly thereafter.

The KDES boys' team in action during the 1984 Girls/Boys Junior High School Basketball Tournament hosted by KDES Feb. 29. Teams from KDES, the Pennsylvania School for the Deaf, the Maryland School for the Deaf in Frederick and Hamilton Junior High School participated in the tournament, with Hamilton winning both the boys' and girls' championship games.

Gallaudet offering two summer tours

Gallaudet College will offer two tours this summer—one in Spain and one in Scandinavia. Both 15-day tours will be accompanied by a sign language interpreter.

The tour of Spain, from June 12 to June 26, will cost \$1,195 and includes roundtrip flight from New York to Costa del Sol via IBERIA Airline, first class hotels, daily continental breakfasts, two nights in Madrid, 11 nights in Costa del Sol, city sightseeing tour in Madrid, a full day in Granada, a Morocco tour, a full day in Tangier, and Gibraltar tours, Costa del Sol casino and nightclub tour, and transfers, baggage handling and local taxes.

The tour of Scandinavia, from June 14 to June 28, will cost \$1,998, and includes roundtrip flight from New York via a FINNAIR wide-bodied jet,

first class hotel accommodations, full breakfast each day, special welcome and farewell dinner parties, five additional dinners, two overnight cruises, three-day Norwegian fjord tour, Scandinavian/English speaking guides, comprehensive sightseeing program via deluxe motorcoach, portage, entrance fees, service charges and local taxes.

The four capital cities tour of Scandinavia will include more motorcoach side trips than the tour of Spain. The tour of Spain is designed to include fewer motorcoach side trips and as much time as possible on the beaches of the Costa del Sol.

For more information about either tour, contact Charles Yeager in the Department of Russian at x5387 (voice and TDD).

Have a (soft) drink for MSSD

MSSD has issued a call to fast-food consumers across campus: "Have a drink, for us, please!" But the call comes with a stipulation—the drinks must be soft and from the Roy Rogers chain of restaurants.

The roast beef emporium is sponsoring a contest and each soft drink purchased has valuable "points." If, by May 5, MSSD has collected 312,000 such points, the school will become the owner of a new Apple IIE computer—free.

Large soft drinks cups carry 50 points, medium cups have 40 and

small drinks are worth 30 points. Translated, 6,240 large drinks equals one Apple IIE.

If the Gallaudet community can consume 112 large sodas every day of 780 each week throughout March and April, the MSSD Learning Resources Center can start clearing space for its new computer.

Twila Ness, librarian of special programming, is coordinating the drink drive and invites everyone on campus to drink to an Apple IIE and send the points to her.

General campus announcements:

- A listing of national organizations and centers of and for deaf persons is now available through the National Information Center on Deafness. To obtain a copy, call x5109 (voice) or x5976 (TDD).

- Faculty and staff members are invited to join in co-ed indoor soccer games every Thursday from noon to 1 p.m. at Hughes Gym. Experience is not necessary. Interested persons should contact JoAnn Demirkan at x5174 (voice and TDD).

- Careerathon '84 will be held Tuesday, March 13 from 10 a.m. to 4 p.m. in the Ely Center. Workshops, presentations and information dissemination designed to assist students in career planning are scheduled during the day.

The Counseling and Placement

Center and the Student Union are co-sponsoring Careerathon '84 with the assistance of the Peer Advisor Program and the Office of Student Development. In addition, the Office of Academic Affairs and Experiential Programs Off Campus, have been involved in the workshop.

The Weight Lifting Club meets on Tuesdays and Thursdays from 6:30 to 8:30 p.m. at Hughes Gym.

- The Kappa Sigma Colony of Gallaudet recently became the first deaf chapter of the Kappa Sigma Fraternity. The new chapter, known as Mu-Iota is the 237th chapter of Kappa Sigma.

Mu-Iota was originally the Theta Nu Tau Fraternity, which was established in 1969. The group's advisor is Dick Hoke.

Golfers prepare for March 18 tourney

A few years ago, a group of dedicated and avid deaf golfers established the Maryland Deaf Golfers Association (MDDGA). Now still growing with over 30 members, the group of men and women golfers participates in monthly tournaments from March to October. Members volunteer to host a tournament at a country club of their choice.

The first tournament for the 1984 season will be held March 18 at the Prince George's Country Club. MSSD employees Rich Pelletier and Jim Hynes will be the hosts for this tourney. The next tournament is

scheduled for April 11-15, at Myrtle Beach, SC. Gallaudet alumnus Jim Niemi is coordinating that event.

Membership to the MDDGA is open to deaf persons over the age of 18. Tournaments are played on a handicap system so one does not need to be a professional golfer to join.

Any deaf Gallaudet employee interested in joining the MDDGA should contact Maryte Shaewitz, Edward Miner Gallaudet Building, campus mail or call x5008 (TDD). She has the 1984 tentative golf schedule available for those interested in obtaining one.

Classified Ads

WANTED: College travelling female companion in Europe for 3 mos. this summer. For more information, contact 544-6155 or P.O. Box 1674.

FOR SALE: Beginner Ski Package, exc. cond., \$100 take all. Skis-Head; Boots-Nordica, size 8; Poles-Scott. See Michelina Martin, Clerc Hall #803 between 9-11 p.m. or leave msg. at x5702.

FOR RENT: Condo in Greenbelt area. 1 br., a/c, washer & dryer, dishwasher, carpet, drapes, exercise room, swimming pool and util. incl.—all for \$430/mo. Available in April. Call Cindy R. at x5959 or 474-3527 after 5 p.m.
